

MUHAMMAD ARSYA DIKA MAULANA

Quito, Ecuador | (+62) 82137896782 | arsyadika25@gmail.com

Professional Summary

Data Analyst with a strong background in agriculture and sustainability. Experienced in transforming operational, spatial, and environmental datasets into actionable insights. Skilled in data analysis, visualization, and GIS-based spatial analysis. Brings a combination of analytical capability and translating complex datasets into clear business for operational improvement, sustainability performance, and strategic planning.

Professional Experiences

Sosial Bisnis Indonesia – Remote, Indonesia

May 2026 - Aug 2026

Project Management Associate

- Led end to end project delivery and ensuring all deliverables met stakeholder timelines and strategic impact goals
- Synthesized scientific, field, and stakeholder evidence into management-level insights that guided agroforestry development and climate-resilient forest strategies
- Managed project reporting, budget control, and performance monitoring, translating operational data into recommendations that improved resource allocation and sustainability investment decisions
- Bridged implementers, government, NGOs, and other stakeholders to facilitate data integration, collaborative field activities, and performed GIS based analysis for coordinated project implementation
- Supported the consulting and implementation of regenerative agroforestry models, integrating agronomic, environmental, socioeconomic, and operational considerations into practical development strategies.

Nestle Indonesia – Yogyakarta, Indonesia

May 2023 - Apr 2026

Grains Agronomist

- Supported decarbonization initiatives through carbon footprint assessments and implementing low-emission agricultural strategies, contributing to a 25% reduction in GHG emissions
- Develop traceability systems to monitor raw material sourcing and quality, supporting sustainable supply chains
- Collaborate with 30+ farmer groups and implemented regenerative agriculture practices across 200+ hectares
- Implement farmer livelihood and social impact programs, through agricultural input support, mechanization, livestock, and incentive schemes reaching 1,000+ farmers annually, laying the groundwork for scale-up program
- Led regenerative practices including crop rotation, cover cropping, and soil health improvement strategies, increasing soil organic matter by 10% in pilot plots
- Conducted soil surveys, soil health assessments, and GIS-based spatial analysis to support data-driven agronomic decision-making
- Improved fertilizer efficiency by 30% and increased crop productivity by 20% through data-driven nutrient management and agronomic strategies
- Coordinated sustainability programs with NGOs, government institutions, auditors, development agencies, and private-sector stakeholders
- Supervised farmer development programs and supported a team of 12 vendor agronomists through technical guidance and field coordination
- Delivered farmer training and demonstration plots on regenerative agriculture, biodiversity, water management, quality, and SHE practices
- Supported supplier continuous improvement on sustainability and certification compliance across multiple vendors, including FSSC, SMETA, and ISO 22000 standards
- Led Monitoring & Evaluation activities in collaboration with third parties including International Rice Research Institute, overseeing data quality and performance tracking for 600+ sample farmers.

Home Credit Indonesia – Jakarta, Indonesia

Feb 2023 - Mar 2023

Data Science

- Perform data hypothesis using algorithms
- Present information to stakeholders for better decision making
- Perform and understand how to process data and define business questions
- Process customer data using specific software according to company criteria
- Perform data interpretations, data cleaning, and data visualization to gain insights
- Complete various tasks such as data analysis, machine learning implementation and business acumen

- A data analytics intensive program with a 10% acceptance rate and a weekly learning commitment of 15 to 20 hours

Education

Sebelas Maret University - Surakarta, Indonesia

Aug 2018 - Oct 2022

Bachelor of Agriculture, Major in Soil Science

- GPA: 3.57/4.0

Projects

Netflix Movies and TV Shows

RevoU Individual Project

January 2023

- Create an interactive dashboard that summarizes the number of movies and tv shows, their year of release, genre, and estimated duration
- Tools: Excel & Google Sheets (Exploratory Data Analysis [EDA], classifiers), Tableau & Looker Studio (visualization)

Covid-19 Indonesia Dataset

Individual Project

January 2023

- Create an interactive dashboard that summarizes active cases, deaths, and confirmed cured cases, as well as covid-19 distribution in each province and active case additions monthly
- Tools: Excel (Exploratory Data Analysis [EDA], classification), Tableau (visualization)

Additional

Technical Skills

- Data & Analytics: Microsoft Excel, SPSS, Looker Studio, Power BI, Tableau, Minitab
- Programming & Data: Python (basic), SQL, HTML, CSS, JavaScript
- Geospatial Tools: ArcGIS, QGIS, GIS-based spatial analysis, MapLibre
- Productivity Tools: Microsoft Office, Google Workspace, Notion

Languages

- Bahasa Indonesia - Native
- English - Professional Working Proficiency
- Spanish – CEFR A2-B1 (Elementary to Intermediate)

Certification & Training

- Webgis Development Bootcamp - MAPID Academy
- Data Analytics - edX
- SQL for Data Analysis - Data Camp
- EF SET English Certification, Advanced - EF SET
